FINDINGS

- Women employees started trending up in 2014, rising by 26 in 6 years. Women jumped from 8 to 34 during its steepest incline between 2014 and 2020. From 2011 to 2017, the company hired more male than female employees and this changed from 2018 to 2020 apart from 2019 when male employees were greater than female. Newly hired employees for Female (34) are higher than that of Male (32). This is a good trend because an organization with diverse teams has increased productivity.
- The age group (20 to 29) and (30 to 39) has the highest number of newly hired employees while the age group 50 to 59, has the lowest number of newly hired employees. The organisation should adopt employing across different ages because this will increase problem-solving strategies, cultural influences and generational diversity.
- Switzerland had the highest number of New Hired Customers at 35 and Europe had 30 New employees while Asia Pacific had the lowest number of New Hired employees at 1.
- Male had 2.41 Average of FY20 Performance Rating and 2.58 Average of FY19 Performance Rating. The female had a 2.42 Average of FY20 Performance Rating and a 2.56 Average of FY19 Performance Rating.
- The Sales & Marketing department has the highest Men at 109 and the HR department has the lowest Men at 5. The operations department has the highest Women at 100 and the Strategy department has the lowest Women at 4. Men and Women employees are positively correlated with each other.

RECOMMENDATION

There should be increased job satisfaction among employees that's why the average performance ratings are low. Having a diverse and inclusive team will lead to increased job satisfaction.
